

Clark Forklift Parts

Clark Forklift Parts - Currently, there are over 350,000 Clark forklifts performing globally, and in excess of 250,000 in service in North America alone. With five main lines across the globe, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand-driven trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 unique models of forklifts, with parts covering more than 120,000 specialized items for all of its automated equipment. Your regional Clark Supplier is your complete source for availability of all your parts needs supplied by Clark Totalift.

Clark has a exceptional Parts Supply team. The components warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their buyers and their sellers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Driven to supply the highest level of value and service to our customers, Clark remains on the leading edge when it comes to enhancing efficiency and benefiting performance.

Clark Totalift has a really outstanding worldwide support network. With over 550 locations globally, seller representation in over 80 countries and 230 locations in North America, their high level of commitment to their clients predominates the material handling market.

By pioneering the operator restraint system protection feature, Clark proudly remains a leader of innovation in the industrial equipment and automated lift truck industry. This exceptional commitment to safety is currently a customary feature on every forklift.

Clark has a unyielding goal to have the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be internationally certified with quality standard ISO 9001 in all of its manufacturing plants. Furthermore, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be prepared for any number of environmental limitations, thus placing them in a prevailing industry position.

Clark has preferred the very economical and beneficial system of "Lean Manufacturing" for its assembly plants and application of resources. This structure was developed to acknowledge the most successful approaches of production plant stewardship and ensuring maximum efficiency. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

Clark's product engineers and suppliers communicate together to develop the efficiency and excellence of their products while minimizing costs. The new value engineering program combines progressive product development and provides improved client support and service within the industry.
