

JLG Forklift Parts

JLG Forklift Part - After retiring in the late 1960's, John L. Grove started on a cross country RV voyage. After spending many years establishing his family built crane business with his brother, John had no idea that this journey would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road expedition.

While on their trip, John spent time talking to past business associates whom the Groves stopped to visit along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John discovered a vast market for a product that could promptly and safely lift people in the air to accomplish upkeep and other construction functions.

Upon returning from their travels, John formed a partnership with two friends and acquired a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty workers, they built and sold the first JLG aerial work platform. The business incorporates some of the basic design elements of that original lift into existing models.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the marketplace. As of today, the company has extended itself into quite a few global marketplaces and continues to develop modern machines to ensure that clients are able to become safer and more well-organized within their workplace.
